# Virtuality

Unity Installation Instruction
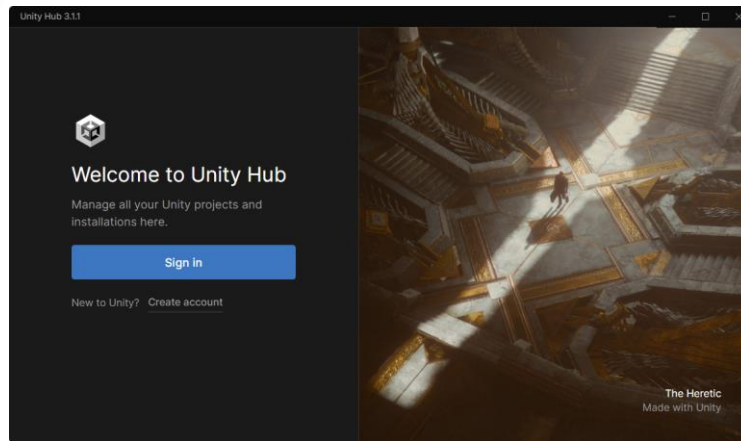

VinMaker

2022

VR Lab

Download UnityHub

- Visit Unity's website to download UnityHub via this **LINK**

- Install Unity Hub and open the application

- Depending on the version, the interface is somewhat similar to the attached image

Sign in

- **Sign In** (if you have a Unity account) or **Create account** (if you don't have one)

- A menu will prompt you to Install Unity Editor, select **Skip Installation**
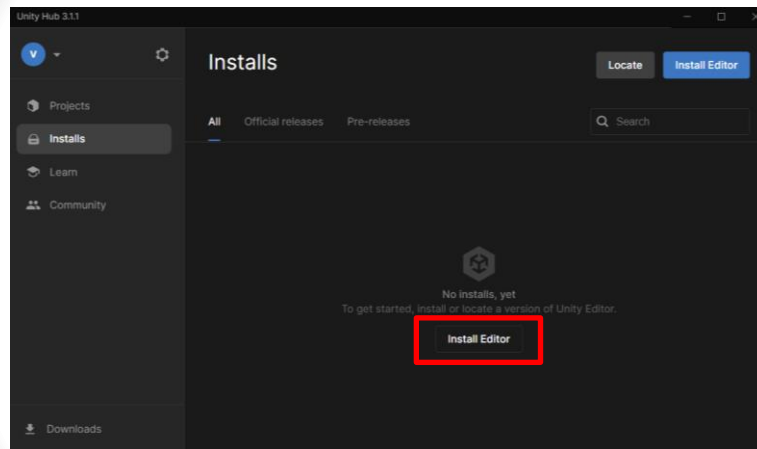

Activate License

- Select **Agree and get personal edition license** to activate UnityHub

Install Editor

- After activation, a similar screen will appear (depending on the version)

- Select **Install Editor**
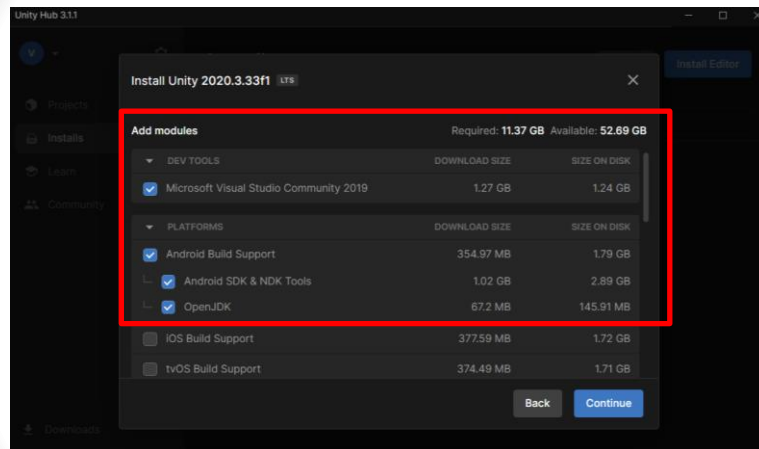

Choose version

- To avoid unexpected bugs and unnecessary version-switching time, we will use the same version of Unity

- Select **Install** the **2020.3.33f1** version

Setup for Android

- **MUST** check all following options
  - ➢ Microsoft Visual Studio Community 2019
  - ➢ Android Build Support
    - ▪ Android SDK & NDK Tools
    - ▪ OpenJDK

- Select **Continue**
- **Agree** to any Agreements/License

Downloading...

- UnityHub will take care of the rest of the installation. It will take some time due to the heavy downloads

- You can continue with other works, but please **do not close** UnityHub until the installation completes
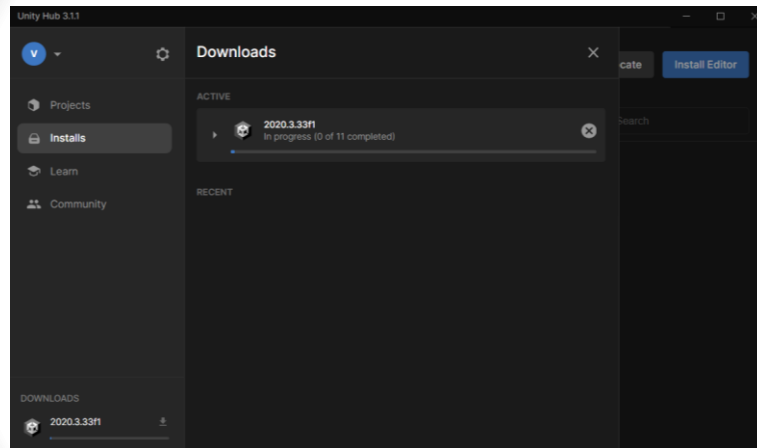

Finish!

- Upon the installation completion, you can close UnityHub and everything is ready for the upcoming workshop!

Contact
